

How 'mixed6' is composed

3 LLM-driven AutoResearch (share a knowledge base)

shared knowledge base (learnings passed between LLM jobs)

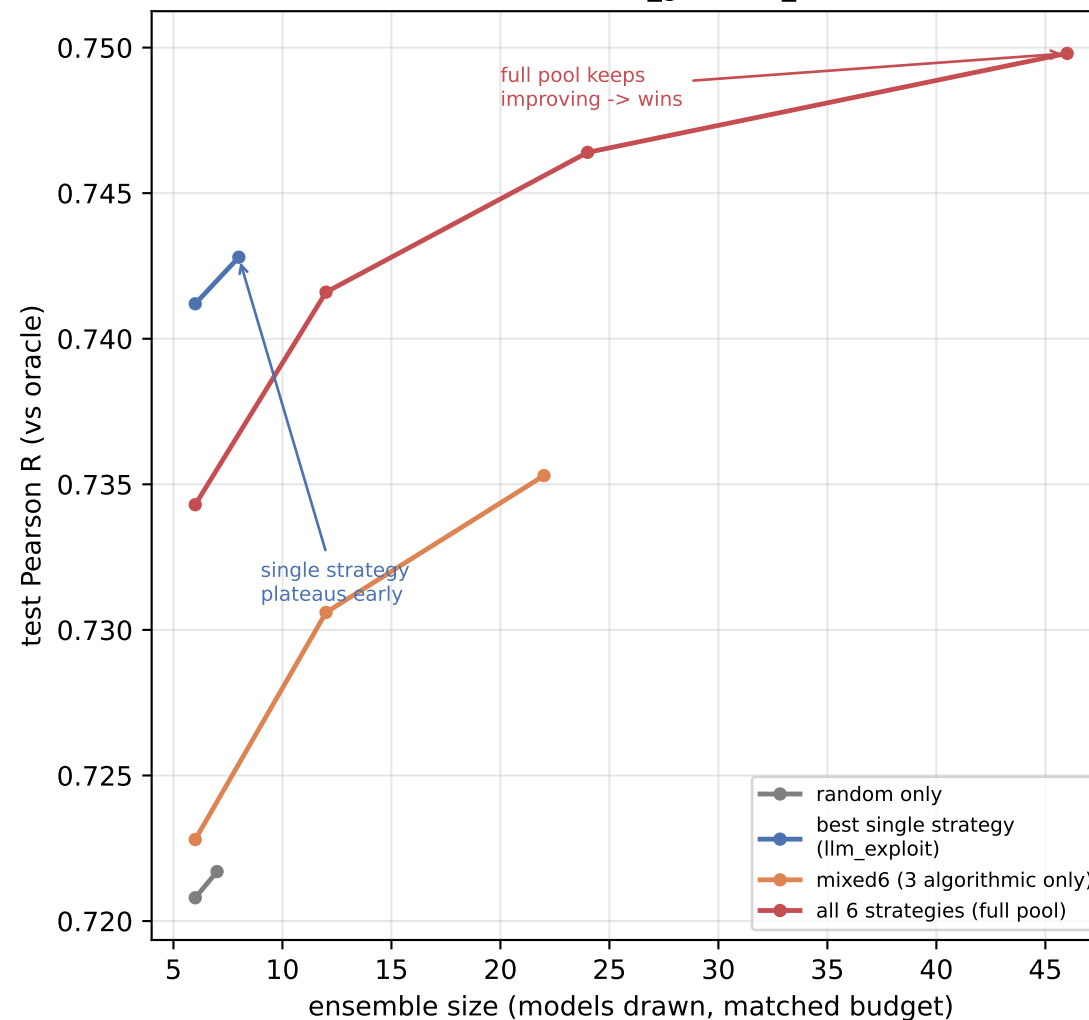

3 algorithmic

all 6 -> one pooled set of trained configs -> ElasticNetCV prune+weight

Backing data: diversity pays off as the pool grows
(K562, D=30k, mixed_genomic_random)

Historical cost win: Phase-4 mixed6 (153 models) test R=0.788 > Phase-2 16-strategy (301 models) R=0.780— half the models.
